AQUAMOOR Series 650mm & 1000mm dia. Mooring Buoys

The Sealite Advantage

- · High visibility colours
- No painting ever
- Strong, polyethylene construction
- Replaceable mooring tube
- Clear identification with optional graphics
- Eco-friendly
- AQM650: 70kg reserve buoyancy
- AQM1000: 145kg reserve buoyancy

The Sealite range of Aquamoor Mooring Buoys are designed to offer customers long life and are suitable for most locations.

The Aquamoor range is avalable in 650mm and 1000mm diameter. The mooring buoys are rotationally-moulded from UV-stabilized virgin polyethylene to a 7mm wall thickness, and are foam filled with closed-cell polyurethane to prevent water ingress in the unlikely event of damage to the outer laver.

The large galvanised mooring tube with 82.5mm ID will accept mooring chain of up to 20mm in diameter. The mooring tube is not moulded into the buoy but slides into a tubular section that runs down the centre of the buoy enabling the tube to be replaced at any stage during the product's service life.

Sealite's Aquamoor Mooring Buoys are capable of supporting substantial loads, and are available in a range of colours for clear visibility.
